# New all time high in net sales - a continuing good operating margin

Despite a very challenging market with price reductions on a number of basic goods, we increased our net sales to SEK **2,337.0** (**2,234.4**) million. The operating result decreased slightly to SEK 381.1 (397.8) million but is still at a very good level. The operating margin was 16.3% and is the second highest ever for a third quarter. Considering the challenging market, especially in retail, I am very satisfied, proud and happy with the result and can state that we continue to gain market share. I think the quarter's results show the strength we have even under more challenging conditions, which we have also shown many times before.

# 9 months - new all time high in both net sales and operating result

During the first 9 months, net sales increased to SEK **6,777.0** (**6,028.5**) million and operating result increased to SEK **1,058.4** (**957.9**) million, both of which are new all time highs for the period. The operating margin was **15.6%** which is basically in line with the previous year.

### **Rolling 12 months**

On a rolling full-year basis, net sales now amount to SEK **9,592.1** million with an operating result of SEK **1,605.6** million, which means an operating margin of **16.7%**. In 2020, net sales were SEK **6,098.8** million, which means that in 2 years and 9 months we had sales growth of SEK **3,493.3** million or **57%**. During the same period, the operating result has gone from SEK **545.9** million to SEK **1,605.6** million, an increase of SEK **1,059.7** or **194%**.

### Cash flow and balance sheet

Cash flow from operating activities amounted to SEK 173.3 (-200.4) million, an improvement of SEK 373.7 million.

We have continued to have a very strong balance sheet with an equity ratio of 55.8%.

### The future

We are very well equipped going forward in terms of organization, brands, products, etc. I am firmly convinced that we will continue to gain market share, which will mean good growth again when the market levels off or reverses. Although it would be presumptuous to wish for a downturn in the economy, such an occurrence would provide opportunities for growth through acquisitions. We have now completed two acquisitions and we have both the financial and organizational resources to carry out more, if the right opportunities arise. With a strong economy and balance sheet, we can maintain large stocks and full service on the stock range, which not all competitors likely will not be able to do. This will give us the opportunity to continue to gain market share. Above all, the sports industry has been and continues to be tough. This is due to declining sales, and also to the fact that our customers in sports had large stocks. This is gradually correcting itself, which within 1-2 quarters could benefit us given our ability to deliver from stock. In a very short perspective, it is difficult to assess the market, but we should still be able to take market shares. Not in the least Craft, where we have very large growth opportunities in teamwear throughout Europe. The same applies to Craft's shoes, which should be able to grow for many, many years. I feel that we should be able to do even better going forward than we have performed in the past. If you look ahead for more than one quarter, I feel confident that we will be able to deliver continued good growth.

The journey has only just begun! Thanks everyone!

### Acqusition

On July 1, New Wave Group AB acquired **100**% of the shares in the Swedish outdoor company Tenson AB. Tenson, the Swedish outdoor & lifestyle brand with roots on the Swedish west coast (founded in Varberg in 1951), has during the last four years undergone a restructuring & repositioning process that included brand, product, market, sales and channel strategies. New Wave Group, through the acquisition and integration of the company, will give Tenson access to the resources and synergies required to enter the next phase of the above-mentioned process - to scale up operations and profitability. For more information, see note 8.

### Personnel and organization

The average number of annual employees as of September 30 was **2,435** (**2,232**) people, of which **49**% were men and **51**% were women. Of the number of employees, **499** (**485**) people work in production.

The production within the New Wave Group is attributable to AHEAD (embroidery), Cutter & Buck (embroidery), Kosta Boda, Orrefors, Seger, Termo and Toppoint.

### **Intangible assets**

The Group's intangible assets with indefinite useful life consist of goodwill and trademarks. The useful lives are assessed to be indefinite because they are well established strategic brands in respective markets which the Group intends to maintain and develop further. The brands with greater value, listed at their acquisition values, are well-known brands such as Orrefors and Kosta Boda within Gifts & Home Furnishings as well as predominately Cutter & Buck within Sports & Leisure. The value of the Group's goodwill and trademarks, which are based on local currency and can give rise to currency translation effects in the consolidated financial statements, have been allocated between the cash-generating units for which they belong. These units are also the Group's segments. The value of these intangible assets is reviewed annually to ensure that the value does not deviate negatively from book value, but can be tested more frequently if there are indications that the value has decreased. In an impairment test, the recoverable amount needs to be determined by a calculation of the respective cash-generating unit's value in use. The value in use is based on established cash flow projections for the next five years, and a long-term growth rate, known as terminal growth. The most important assumptions in determining the value in use

include growth rate, operating margin and discount rate (WACC). As the cash generating units have different characteristics, each unit is assessed after its commercial factors. The estimated cost of capital (WACC) is considered to be representative of all cash generating units.

Based on the tests and analyses that have been carried out during the quarter, there is currently no need for impairment, nor for impairment of the comparison year.

### Related party transactions

Lease agreements exist with related companies. Companies related to the CEO have bought merchandise. In addition, there are transactions with related parties at insignificant values. All transactions have taken place on market terms.

### The Parent company

Total revenue for the quarter amounted to SEK 39.0 (47.4) million. Result before year-end allocations and tax amounted to SEK 11.7 (47.9) million. The lower result is mainly attributable to the fact that last year includes dividends from foreign subsidiaries. The net debt amounted to SEK 1,963.6 (1,558.5) million. The parent company's net financing to subsidiaries amounted to SEK 2,742.5 (2,141.5) million. The increase in net debt and net financing to subsidiaries is related to the subsidiaries' inventory build-up. The cash flow from investment activities amounted to -0.7 (-408.9) MSEK, where last year includes the acquisition of B.T.C. Activewear Ltd. The balance sheet total amounted to SEK 5,832.8 (5,228.7) million and the equity, including the equity share of untaxed reserves, to SEK 2,699.0 (2,533.1) million.

Total revenue for the period January-September amounted to SEK 115.8 (121.4) million. Result before year-end allocations and tax amounted to SEK 472.7 (259.8) million. The improvement in earnings is mainly attributable to dividends from foreign subsidiaries. The cash flow from investment activities amounted to SEK 46.8 (-408.7) million. This year's cash flow includes an internal company sale while last year's includes the acquisition of B.T.C. Activewear Ltd.

### Review report

New Wave Group AB, corp. id. nr. 556350-0916

### Introduction

We have reviewed the condensed interim report for New Wave Group AB as at September 30, 2023 and for the nine months period then ended. The Board of Directors and the Managing Director are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

### Scope of review

We conducted our review in accordance with the International Standard on Review Engagements, ISRE **2410** Review of Interim Financial Statements Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS **34** and the Swedish Annual Accounts Act regarding the Group, and in accordance with the Swedish Annual Accounts Act regarding the Parent Company.

### Note 1 - Accounting policies

This report is prepared in accordance with IAS **34** Interim Financial Reporting and the Annual Accounts Act. The interim report for the Parent Company has been prepared according the Annual Accounts Act as well as RFR **2** Reporting for Legal Entities. Applied accounting policies are otherwise consistent with the 2022 Annual Report.

### **New accounting policies for 2023**

Several amendments to existing standards have been published and will come into effect in 2023 and beyond. One of these is changes in IAS 1 - Disclosure of accounting principles. To support the changes, the IASB has also developed guidance and examples to explain and identify a significant accounting principle. The company's management assesses that this change is expected to affect information about applied accounting principles and work is underway to evaluate these effects in their entirety. Other changes are not considered to have a significant impact on New Wave Group's financial reports.

### Note 2 - Risks and risk control

New Wave Group's international operations mean that it is continuously exposed to various financial risks. The financial risks are interest rate risks, currency, liquidity and credit risks. In order to minimize the effect these risks may have on earnings, the Group has a risk policy. For a more detailed description of the Group's risk management please refer to the Annual Report 2022, note **16**, p. **98-104**. The Annual Report is available at the Group's headquarters in Gothenburg, Sweden, as well as at **www.nwg.se**.

The Group's policy is to have short fixed-rate interest periods, which means that fluctuating short-term interest rates have a rapid impact on the Group's net interest income.

The conflict between Russia and Ukraine has significantly increased geopolitical tensions, which in turn has a major impact on world trade. In this context, New Wave Group has marginal business with both Ukraine and Russia. Furthermore, the war also means increased uncertainty about economic development.

Group management and each company management closely monitor developments in the conflict between Russia and Ukraine and work closely with suppliers and customers. Strategies and activities are continuously adapted as the situation develops.

Besides the above, the Group's reported risks are deemed to be essentially unchanged.

Besides the above, the Group's reported risks are deemed to be essentially unchanged.

# Note 3 - Reporting of operating segments

# Note 8 - Acquisition of Tenson AB

On July 1, New Wave Group acquired **100**% of the shares in the Swedish outdoor company Tenson AB. The purchase price amounted to SEK **1**, which was based on equity at the time of acquisition on July 1, 2023 amounting to at least SEK **6.5** million, where the brand was valued at SEK **30.9** million. This resulted in a positive profit effect of SEK **6.5** million, which was reported under other operating income.

Tenson, the Swedish outdoor & lifestyle brand with roots on the Swedish west coast (founded in Varberg in 1951) has, during the last four years, undergone a restructuring & repositioning process that included the entire spectrum of brand, product, market, sales and channel strategies. New Wave Group, through the acquisition and integration of the company, will give Tenson access to the resources and synergies required

to enter the next phase of the above-mentioned process, to scale up operations and profitability.

In 2022, the Tenson group's sales amounted to SEK **129.7** million with a loss after tax of SEK **8.5** million. The acquisition is not expected to have a major effect on earnings in the second half of 2023, but is expected to have a positive effect on New Wave Group's earnings already in 2024.

The acquisition analysis is preliminary and subject to adjustment.

# Definitions of alternative performance measures

Guidelines concerning non-IFRS performance measures for companies with securities listed on a regulated market in the EU have been issued by ESMA (The European Securities and Markets Authority). These guidelines are to be applied to alternative performance measures (APM) applied as of July 3, 2016. The Interim Report refers to a number of non-IFRS performance measures used to assist investors and company management to analyze the company's operations. Because not all companies calculate the financial measures in the same way, these are not

always comparable to measures used by other companies. These financial measures should not be seen as a substitute for measures defined under IFRS. A description of the various non-IFRS performance measures used as a complement to the financial information reported according to IFRS and how they are used, is presented below. A reconciliation of alternative performance measures is available on <code>www.nwg.se/en/investor-relations/financial-reports/key-numbers.</code>

| PERFORMANCE<br>MEASURES<br>GROSS PROFIT MARGIN | DEFINITION/CALCULATION  Net sales less goods for resale in percent of net sales.   | PURPOSE  The measure is used for showing the Group's margins before the effect of costs such as selling and administrative costs.                             |
|--|--|---|
| OPERATING MARGIN                               | Operating result as a percentage of the period's net sales.  | The measure is used to show operating profitability and how the Group meets its targets.  |
| PROFIT MARGIN                                  | Result before tax as a percentage of the period's net sales.   | The measure enables the profitability to be compared across locations where corporate taxes differ.   |
| NET MARGIN                                     | Result after tax as a percentage of the period's net sales.  | The measure is used to show net earnings in relation to income.   |
| NET SALES GROWTH                               | Sales growth including currency effects.   | The measure is used to show growth in the Group and to measure how the Group meets its targets.   |
| ORGANIC GROWTH                                 | Organic growth refers to sales growth from existing operations cleared from currency effects. The currency effect is calculated by recalculating this year's sales in local currencies to last year's rates and compared to previous year's sales. | The measure is used to show growth in existing business since currency effects are beyond the Group's control and to measure how the Group meets its targets. |
| OPERATING MARGIN<br>BEFORE DEPRECIATIONS       | Operating result before depreciation as a percentage of the period's net sales.  | The measure is used to show operating profitability and how the Group meets its targets, regardless of depreciation, amortization and write-downs.            |
| net financial items                            | The total of interest income, interest expenses, currency differences on borrowings and cash equivalents in foreign currencies, other financial income and other financial expenses.   | The measure reflects the Group's total costs of the external financing.   |

| RETURN MEASURES               | DEFINITION/CALCULATION   | PURPOSE   |
|-------------------------------|--|---|
| return on<br>Capital employed | Rolling 12 month's result before tax plus financial expenses as a percentage of average capital employed. The average capital employed is calculated by taking the capital employed per period end and the capital employed at year-end for the previous year divided by two.  | The measure is used to analyze profitability by putting result in relation to the capital needed to operate the business. |
| RETURN ON EQUITY              | Rolling 12 month's result for the period according to the income statement as a percentage of average equity. The average equity is calculated by taking the equity per period end and the equity at year-end for the previous year divided by two. For the Parent company it is calculated as result after tax as a percentage of average adjusted equity. In adjusted equity, the equity part of untaxed reserves is included. | The measure is used to analyze profitability over time, given the resources available to the Parent company's owners.     |

| DATA PER SHARE                   | DEFINITION/CALCULATION   | PURPOSE  |
|----------------------------------|--|--|
| EQUITY PER SHARE                 | Equity at the end of the period divided by number of shares at the end of the period.  | Equity per share measures the net asset value per share and determines if a company is increasing shareholder value over time.   |
|                                  |  |  |
|                                  |  |  |
| CAPITAL MEASURES                 | DEFINITION/CALCULATION   | PURPOSE  |
| EQUITY                           | The equity reported in the consolidated balance sheet consists of taxed equity increased by the equity portion of the Group's untaxed reserves and non-controlling interests. Deferred tax liability in untaxed reserves has been calculated at the applicable tax rates for the companies in each country, as decided and communicated at the balance sheet date. | The measure is the difference between the Group's assets and liabilities, which corresponds to the Group's equity contributed by owners and the Group's accumulated profits. |
| CAPITAL EMPLOYED                 | Total assets less provisions and non-interest bearing liabilities, which consist of accounts payable, current tax liabilities, other liabilities and accrued expenses and prepaid income.  | The measure indicates how much capital is needed to run the business, regardless of type of financing (borrowed or equity).  |
| WORKING CAPITAL                  | Total current assets, excluding liquid assets and current tax receivables, less short-term non-interest bearing liabilities excluding current tax liabilities.   | The measure is used to show how much capital is needed to finance operating activities.  |
| NET DEBT                         | Interest-bearing liabilities (current and non-current) less cash and cash equivalents.   | The measure shows financing from borrowings.   |
| NET DEBT TO CREDIT<br>INSTITUTES | Interest-bearing liabilities (current and non-current) less lease liabilities and less cash and cash equivalents.  | The measure shows financing from borrowings excluding lease liabilities  |
| CAPITAL TURNOVER                 | Rolling 12 month's net sales divided by average total assets. The average total assets is calculated by taking the total assets per period end and the total assets at year-end for the previous year divided by two.  | The measure shows how efficiently the Group uses its total capital.  |
| inventory turnover               | Rolling 12 month's goods for resale in the income statement divided by average inventory. The average inventory is calculated by taking the inventory per period end and the inventory at the same period for the previous year divided by two.  | The measure is used to show the inventory's turnover per year, since the stock is central for the Group to keep a good service level, i.e. to be able to deliver goods fast. |
|                                  |  |  |

The measure helps show financial risk and is useful for management to monitor the level of the indebtedness.
